A unique combination of the latest Texas Instruments DLP® Pico chipset, an LED light source and Optoma expertise has enabled a pocket projector that is not only incredibly small and light but produces remarkable image quality.

DLP® technology enables an incredible contrast ratio for a pocket projector which, when coupled with the amazing colour reproduction of the LED light source offers images of exceptional quality, detail and clarity. The Optoma Pico sets the standard for pocket projector image quality.

Super efficient LED technology enables a remarkable battery life of up to 1.5 hours enabling a movie to be viewed on one battery charge.

Handheld devices need to be able to withstand everyday knocks and bashes. The ultra reliable DLP® and LED technology used ensures you can always depend on the Optoma Pico to project your images wherever and whenever you need them.
